

AM36

The industry leader in dependability and quality for over 30 years, Huber is proud to announce the next line in industrial vacuum products, the AM36. With a patented 9-stage cyclone, the AM36 provides superior filtration that is higher than the industry standard. The AM36 utilizes 33% fewer bags than the competition and reduces replacement cost.

Capable of up to 5,300 CFM, the AM36 provides the highest vacuum power in its class. The Huber AM36 provides the versatility of maximum material separation and deep vacuum capability. Whether vacuuming wet or dry products, a light gross weight and a large debris tank allow the AM36 to handle a larger payload.

AM36 FEATURES

FILTRATION BAGHOUSE
UTILIZES FORTY 60" BAGS

9-STAGE CYCLONE

SIMPLE CONTROLS

3600 GALLON TANK

HYDRAULICALLY
OPERATED REAR DOOR

STANDARD FEATURES

- ❑ 3600 gallon carbon steel tank with 1/4" shell
- ❑ Patented centrifugal 9-stage cyclone
- ❑ Hydraulically operated rear door with integrated valves
- ❑ 45° dump angle
- ❑ 6" intake and discharge ports
- ❑ LED rear work lights, LED running lights
- ❑ Backup alarm, grounding reel
- ❑ Baghouse utilizes forty 60" bags

OPTIONS

- ❑ Tank mounted hydraulic or electric vibrator
- ❑ Hydraulically operated boom with 22' reach (wireless operation)
- ❑ Water packages:
 - 10 GPM @ 2500 psi
 - 20 GPM @ 4000 psi
- ❑ 8" intake
- ❑ Sludge pump
