

THE KNIGHT: DEVOTED TO SERVICE DEDICATED TO EXCELLENCE

Developed in 2008, the **Knight™** incorporates all of the features of the **KingVac®** with the patented filtration technology of the **AirLord®**. The ability to efficiently move dry product combined with the deep vacuum of our 3700 CFM liquid ring pump allows the **Knight™** to excel at a variety of tasks such as: hydro-excavation, hazmat response, jetting and general industrial cleaning in industries such as gas, oil, and mining. Whether working with wet or dry product, the **Knight™** will deliver uncontested power and performance.
