**PROVEN HYDRO EXCAVATION  
POWER IN A COMPACT FOOTPRINT**

# TerraVac® Xpose800

## KAISER Premier's TerraVac Xpose800, the proven power of our CV Series® Hydrovac in a compact footprint

### The right solution for municipal applications

The KAISER Premier TerraVac Xpose800 trailer measures only 21' long and 8' 6" wide with a height of just 8' 8". Designed to be a powerhouse within a small footprint, we did not compromise ground clearance or maneuverability.

Equipped with an 800-gallon debris tank and 400-gallon fresh water capacity, the TerraVac Xpose800 has the best feature set for the most common municipal applications. Whether your jobs include potholing, daylighting, or material reclamation the TerraVac Xpose800 will be your go-to tool.

### Rugged and reliable

The TerraVac Xpose800 may be small, but that does not mean it is not tough enough to tackle the jobs to you do most often. The debris body is lined with a welded stainless-steel floor for long-term durability. A bolt-on deflector plate can be quickly replaced during routine maintenance. Conveniently located grease banks and easily accessible oil drains have been placed to reduce maintenance time.

Operating power is supplied by a 49-Hp diesel engine. Easily cut through soil and clay with up to 4,000 psi of pressure at 4.5 gpm. The blower is rated for 960 cfm of

suction, capable of 15" Hg vacuum with 5 psi positive pressure. The 30' suction hose (3" diameter) attaches to the 4" loading port via a 3" reducer. Digging tools include a 6' dig lance and a 36" wash gun. Also included are 4'- and 6'-long suction extensions.

The controls feature an ignition reset for the water pump to prevent accidental damage or injury. When the engine shuts off, the water pump also shuts off. This safeguard eliminates the risk of the water pump accidentally being engaged when the engine turns on.

The TerraVac Xpose800 has been engineered for reliability and productivity. The dump door is secured via a proven locking bar system similar to Kaiser Premier's CV Series Hydrovacs. A central door locking design ensures a tight seal without using grabbing claws or internal hydraulics. The dump door also features a 6" dumping port for positive pressure offloading.

### Built for your success

The TerraVac Xpose800 provides an optimized and affordable solution for smaller or hard to access applications. Increase productivity and accept a wider range of jobs with KAISER Premier's TerraVac Xpose800.

# DETAILS AT A GLANCE

4" Loading Port with 3" Reducer

30' suction hose, 3" diameter

1/4" Steel Debris Tank, 800 gallons

Ergonomic Control Panel

Easily Accessible Pressure/Vacuum Controls

6" Drain Port with Knife Gate Valve

Secure Door Locking Mechanism

50' Hose Reel, 3/8" diameter

Optional Glycol Tank

## KAISER. A SUCCESSFUL FAMILY-OWNED COMPANY FOR OVER 100 YEARS.

Our focus on value and our capacity to innovate as a family-run business remain, to this day, the basis for our international success. Value and innovation form the cornerstones for sustainable development in the future.

Markus Kaiser

KAISER AG is a family-owned company based in Liechtenstein. Since its founding in 1913, the company has grown into an international industrial enterprise with sites in Liechtenstein, Italy, Finland, Austria, Slovakia, and the United States. We have a history of innovation. Our inventive genius enabled KAISER AG to continuously advance, leading to the development of industry-leading products.

### INTERNATIONAL EXPERIENCE, LOCAL PRESENCE

With six international locations, KAISER has a network of over a 100 sales and service partners worldwide. We have vehicles on five continents, in 116 countries, and over 1,000 cities.

KAISER has numerous years of experience in the US market with MORO KAISER Components and KAISER Excavators. At KAISER Premier, which has its own manufacturing facility, the focus is on hydrovac and recycling vehicles.
