

2023 PETERBILT 567 TORNADO F4 ECO-LITE HYDROEXCAVATOR

F4 ECO-LITE

EQUIPMENT SPECIFICATIONS

- DEBRIS:** 12-yard debris tank / Internal epoxy coating, external level gauges.
- WATER:** 1550 US gallon water tank / Internal epoxy coating, external level gauges, sight glasses, side and top fill.
- VACUUM BLOWER:** Robuschi 125 Blower (3800 CFM / 28" Hg) / Positive displacement blower. Full 28-inches Hg pull direct-driven by a transfer case. Automatic vacuum breaker controlled by wireless remote. PD blowers have proven themselves superior to fan systems time and again for versatility and power.
- BOOM:** 8-inch TopGun Hydraulic Boom (26-foot reach, 342° rotation)/Tornado's patented head-mount design offers superior reach, mobility and ready-to-dig instant setup. Without assembling any hoses or dig tubes, the boom simply uncradles and operators immediately begin digging as much as 20-feet down before any extensions are required. Operated by wireless remote. **WATER PUMP:** PratisoliKT28AWaterPump(Max2900PSI,18GPM)/Pratisoliforreliabilityandusercontrol. Completewithinlinerpumpfilter.
- BOILER:** Dynablast 700,000 BTU Boiler, 12 Volt Ignition. For frozen or hard-compacted soils, nothing beats hot water. Tornado's boiler offers independent diagnostic system and thermostat control. Included Inverter.
- FILTRATION:** Cyclone & Cartridge Filtration System / Our unique 3-stage design delivers superior filtration. Integrated water tank/cyclones take less space with lower noise output. The cleanable cartridge is easily accessible and features an integrated vacuum break system. **SILENCERS:** Dual Chamber Silencer System
- OFFLOADING:** Tornado Patent Pending Curved Floor / This system means no tank hoisting and permanent vacuum piping.
- DEBRIS DOOR:** 48 x 52-inch Hydraulic Gate / Large dump door for fast, reliable unloading.
- CONTROLS:** Flodraulics Control Center and Wireless Remote Control / Control all functions by wireless remote for one-man operation, backed-up with concise manual controls if required.
- CABINTRY:** Tornado Fully Insulated Van Body – 70-inch width / Critical components are centralized and housed in a lighted, insulated and heated van body. Functional space for operators on both sides of the vehicle.
- LIGHTING:** LED Work Light Package / Externally-mounted, lighted cabinets
- SERVICE CENTER:** Tornado Control & Electrical Panel / Includes hour-meters and recording for boiler, pumps and blower. Simple, clean and protected in an all-weather panel box in the van body enclosure.
- PAINT:** 2 Tone black & white, includes professional sandblast and paint
- DIGGING ACCESSORIES:** High Pressure Dig Hose, One (1) 8-inch Dig Tube, One (1) 6-inch Dig Tube (with two 6-inch extensions and one 8 to 6-inch reducer), two Dig Wands, Wash-Out Wand, Automatic-Pneumatic Hose Reel (with 75-feet water hose)
- SCALES:** Right Weigh on-board digital scales with bluetooth

CHASSIS SPECIFICATIONS
